

NEW AGE
WPC TUBES

Wood Polymer Composite

Presenting a remarkable combination of nature and technology, that offers a highly Superior, Resilient and Cost Effective alternative to real wood timber. Created from the fusion of hardwood fibres and polymer resins, WPC Tubes are Pre Finished, Ready to Install, Completely Water & Termite Proof and durable enough to last a lifetime.

Wide Applications

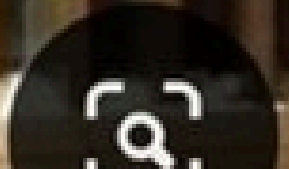

Timber Tubes can be used to create beautiful partitions instantly and to replicate the look of wooden beams and columns on walls & ceilings of your any space without the fear of deformation, breakage, discoloration.

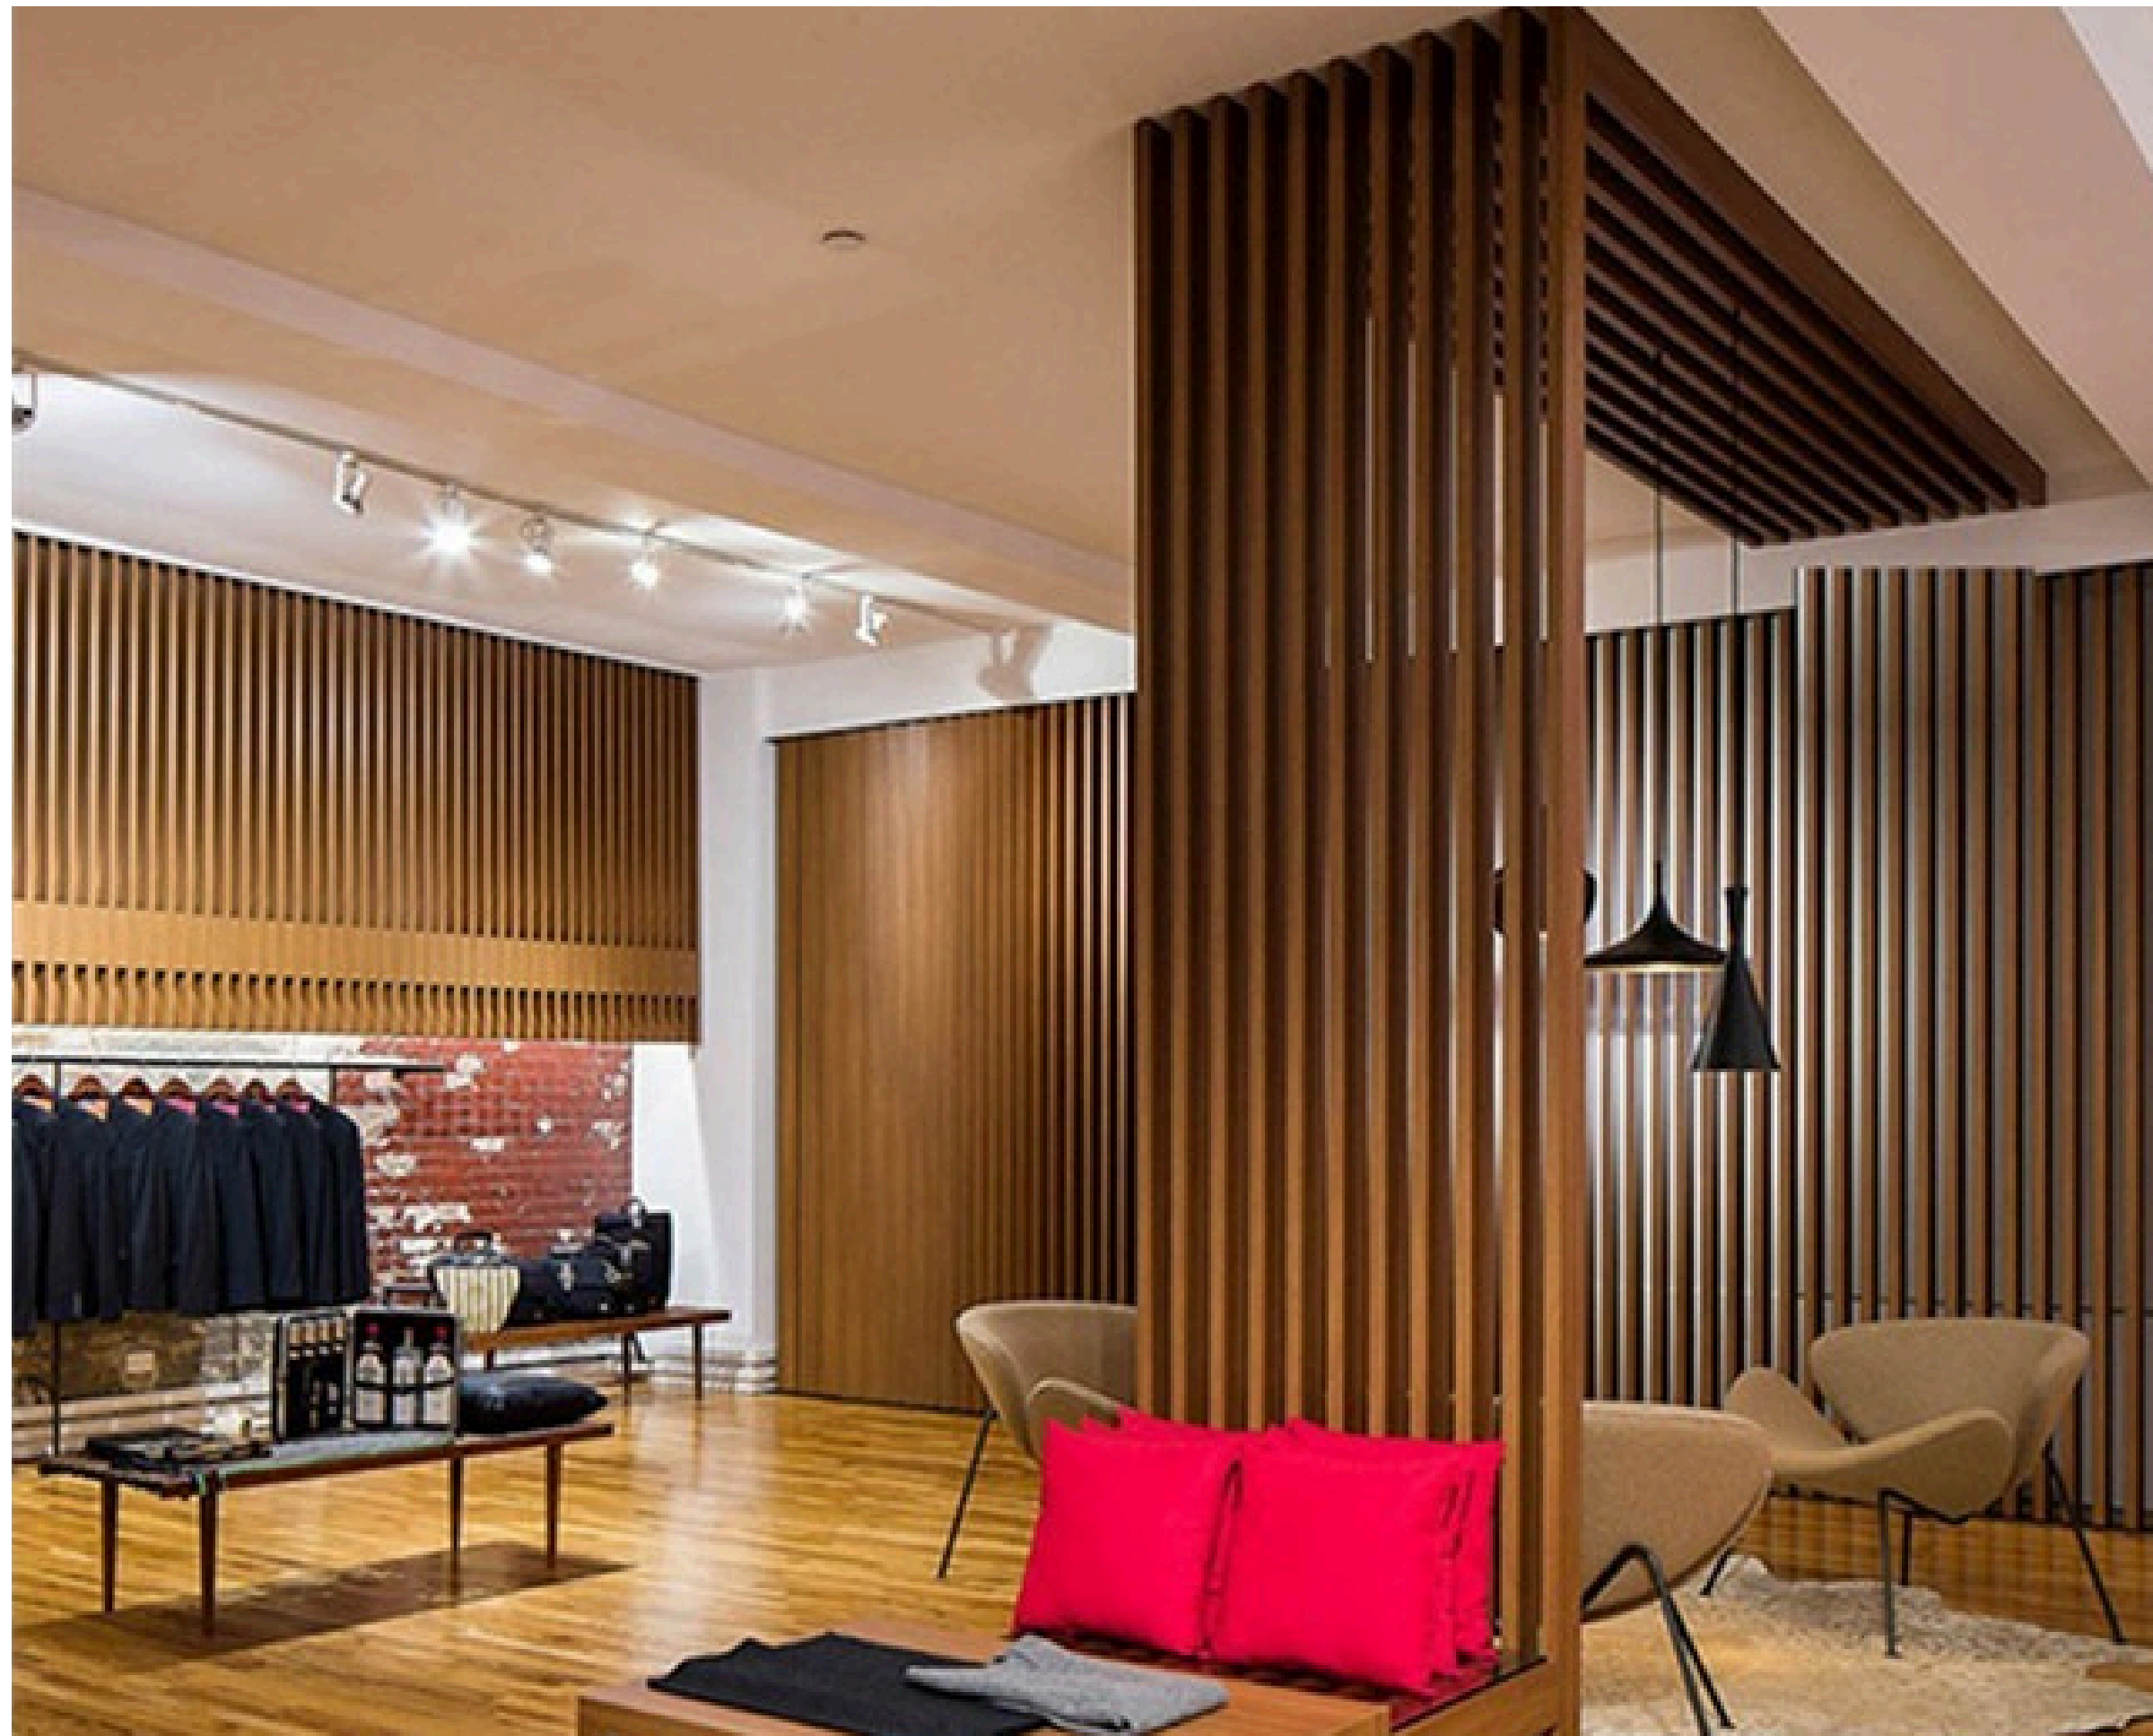

Economical

Our tubes are not just an economical alternate to real wood timber but infact a very quick and everlasting solution that is easy to fix and simple to maintain.
